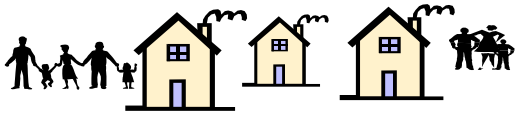
Your Data ... Your Story
Data Resource Center for Child & Adolescent Health
A project of the Child and Adolescent Health Measurement Initiative

www.childhealthdata.org

2011/12 National Survey of Children's Health (2011/12 NSCH)
Sampling and Survey Administration



Randomly sampled telephone numbers are called to find households (HHs) with children ages 0-17

One or more children ages 0-17 living in household?

YES

NO → **End Call**

Interviewer asks the ages of all children living in HH

In each HH, one child is randomly selected to be the subject of the interview

Adult in HH who knows the most about child's health & health care is asked the interview questions

Sections 1 – 5 of the survey are asked for children of all ages

<u>Early Childhood</u> questions (Section 6) are asked for children ages 0-5

<u>Middle Childhood & Adolescence</u> questions (Section 7) are asked for children ages 6-17

Sections 8 - 11 of the survey are asked for children of all ages

Additional Health Insurance Questions (Section 12) are asked for <u>children who are uninsured</u> at the time of the survey

End of Interview

- **95,677 child-level NSCH interviews completed nationally**
- **Approximately 1,850 interviews collected per state** (number of interviews per state range from 1,811 to 2,200)
- **NSCH results are weighted to represent the population of non-institutionalized children ages 0-17 nationally, and in each state**
